SUMMARY

MCA graduate and Backend Developer with hands-on experience designing and building scalable backend services and REST APIs using Node.js, NestJS, and Python. Skilled in integrating third-party APIs, implementing secure authentication with OAuth 2.0, and managing relational databases with MySQL. Experienced in API testing and debugging with Postman, following clean, modular, object-oriented coding practices. Strong understanding of data structures, algorithms, and the full software development lifecycle from design to production deployment.

EXPERIENCE

Backend Developer Intern — Smackcoders Inc

June 2025 – Dec 2025

- Developed 3+ backend services using Node.js and NestJS, integrating third-party APIs including Gmail API, Google Sheets API, and Zoho Projects API.
- Implemented OAuth 2.0 authentication and authorization flows to enable secure, token-based API access.
- Performed API testing and debugging using Postman, ensuring reliable request/response validation across integrations.
- Tested and deployed 10+ integrations to production, ensuring scalability, stability, and production-ready performance.

PROJECTS

Nexus — Intelligent E-Commerce Platform with Workflow Automation

- Built a scalable e-commerce platform with full CRUD functionality; developed backend REST APIs using Node.js and Express, with data persistence managed in MySQL.
- Designed and optimized database schema and API endpoints to support scalable order and inventory management.
- Built a chatbot to handle customer queries in real time, reducing manual support effort and improving response turnaround.

AI-First CRM (HCP) — Agentic Workflow

- Built a full-stack, AI-first CRM module using React, FastAPI, and LangGraph to power agentic workflows under a tight project deadline.
- Implemented backend AI agent logic with LangGraph, orchestrating multi-step reasoning and tool-calling workflows connected to a FastAPI service layer.
- Integrated the React front end with FastAPI endpoints, handling state management, API communication, and error handling end-to-end.

Omnichannel Retail Sales & Inventory Analytics Dashboard

- Built an end-to-end retail analytics solution integrating online and offline sales data; cleaned and preprocessed data by fixing timestamps and removing outliers.
- Used SQL to analyze sales performance, inventory movement, and revenue trends; built interactive Power BI dashboards tracking Total Sales, Revenue per Order, and City-wise Order Volume.
- Performed time-series analysis to identify seasonal trends and peak sales periods, delivering KPI-driven insights for inventory planning.

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, SQL
- Backend Frameworks:** Node.js, Express.js, NestJS
- AI & Agentic Tools:** LangGraph, LLM API Integration (Claude, OpenAI, Gemini)
- Frontend:** React.js (basic)
- Database:** MYSQL, CRUD Operations
- Data & BI Tools:** Power BI, Data Cleaning, Trend Analysis, KPI Reporting
- Testing & Tools:** Postman, Git, GitHub, Unit Testing

EDUCATION

Master of Computer Applications (MCA)

Sep 2023 – June 2025

Hindusthan College of Engineering & Technology

Bachelor of Computer Science (B.Sc.)

June 2020 – Apr 2023

Sadakathullah Appa College

CERTIFICATIONS

- Node.js Developer Intern** — Smackcoders: 6-month internship with hands-on backend development and REST API experience.
- Kaggle — Python Coder** (Nov 2025) demonstrating applied Python proficiency.
- Data Analyst** — Infotact Solutions: Completed a 3-month Internship with hands-on experience in Data Analysts
